

# Newsletter André Malraux

January-February-March 2023

The end of winter and the arrival of spring are an opportunity for a new edition of the school newsletter with new information. Indeed, the school has not been in hibernation and there have been many activities and projects since the beginning of the year 2023. Enjoy reading!

# World Book day

The opportunity was too good to miss.  
Many pupils came dressed as their favourite book hero.  
Others preferred to bring their favourite book to share.

Another example of the importance of reading: from March onward, the CM2 will regularly visit the MS to read with the younger pupils. This is a good way to pass on the pleasure of reading.

# Foodbank

As you already know, thanks to everyone's help, we have set a new school record for how much food was brought: 662kg. With the help of the Parents' Association, the pupils of the Children's Council went to the Hanwell Foodbank to find out what was to become of the collection.

The children's council has worked on this Book Creator to present to you what they have found. You can peruse it here:

## CM2 Project: Valentine's Day

Thanks to the Amicale parents, the CM2 are carrying on with their actions to organise a special moment at the end of the year. Please continue to support them.

# Galette des rois en Maternelle

In January, the Maternelle pupils worked on the recipe of the Galette. The parents of MS were also able to come and share a special moment in the classroom.

## New location for the secretary's office

In order to comply with English standards, the secretary's office is now located in the former director's office. This room can indeed accommodate the new infirmary space.

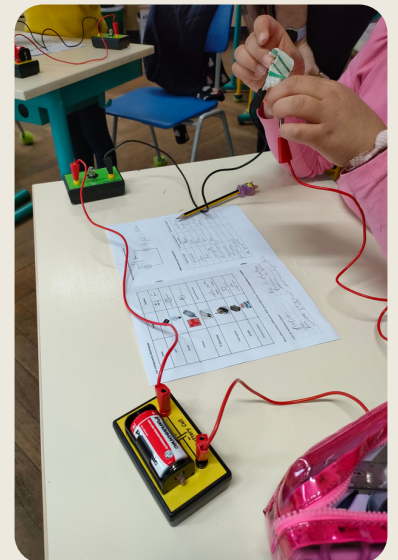

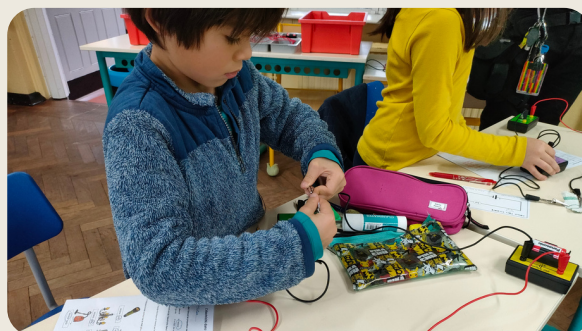

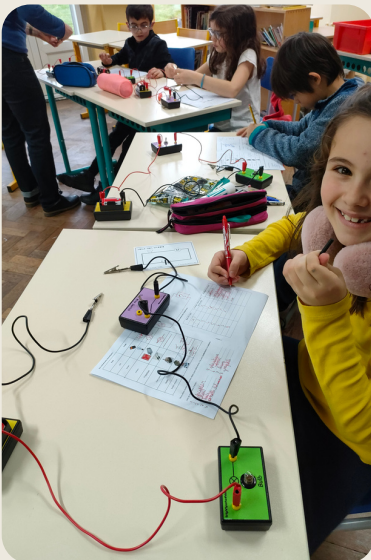

# Circus activities in Maternelle

The Maternelle classes are currently completing work with a circus performer. The emphasis is on balance, agility and concentration.

## Science in CE1

Tanya, a science teacher at the Lycée, works with different classes on Fridays to develop their scientific approach. Here, the CE1s are discovering how electrical circuits work.

# Who's who at André Malraux?

This time we turn to your favourite Caretaker, Winston, to answer some questions.

## ***Winston, can you tell us about yourself?***

I am an outgoing person who likes to have a smile on my face.

## ***For how long have you been working at the school?***

When I started working for the Lycée, I would say to others: "You've been working here that long...". Now, it's other people who say that to me.

I've been working for the Lycée since 1984 and have been at André Malraux for 3 years.

## ***What do you like about your job?***

I enjoy working at André Malraux because... there are no stairs and there were a lot at South Kensington. There is also a sense of community here and I enjoy the interactions with children and their parents.

## ***What is difficult about your job?***

Nothing in particular besides....foxes!

## ***What are your hobbies?***

Outside of school, I work with my wife who is into event planning: weddings, parties, fashion shows... Name any type of event. We've done it!

I also enjoy archery.

# Upcoming events

## Open morning

On Wednesday 29th March. Spread the news!

Online registration:

## DIY Sales by the pupils of CM2

As part of their end-of-year project, the CM2 will be selling items they have made on Friday 31st of March at pick-up time in the parents playground.

## Maternelle Choir

On the morning of Thursday 30th March, the three classes of Maternelle will hold a choir performance for their parents. More information on this event will follow.
